WHO WE ARE:

Camber Energy, Inc. is a growth-oriented energy company, targeting opportunities in the power generation, clean energy and resource sectors.

OUR STRATEGY:

Create value through a diverse portfolio of innovative, clean energy technologies combined with stable positive cash flows from conventional energy and resource opportunities.

Camber Energy, Inc. owns a majority of the issued common shares of Viking Energy Group, Inc. whose portfolio consists of the following:

Leading manufacturer and supplier of industrial engines, power generation products, services and custom energy solutions.

Intellectual Property rights to a fully developed, patent pending, ready-for-market proprietary Waste Treatment system using Ozone Technology.

Intellectual property rights to fully developed, patent pending, ready-for-market proprietary Electrical Transmission and Distribution Open Conductor Detection Systems.

Intellectual Property License Agreement with ESG Clean Energy, LLC regarding its patent rights and know-how related to stationary electric power generation, including methods to capture 100% of carbon dioxide and to utilize heat to produce saleable commodities (e.g. distilled water, DEF, NH3, NH4).

Interests in conventional oil assets in the Mid-Continent Region (USA).
